16. Abstracts

This inventory report is a summary compilation of the major facilities of real property owned by the Federal Government in this state. The installations are listed alphabetically by the city in which they are located and the listing includes a brief description of the installation, the agency which operates the facility, the GSA inventory number, the GSA location code, the total floor area of all the buildings and a size classification code. The operating agency and installation descriptions are those reported to the General Services Administration as of June 30, 1970. Installations with a total floor area less than 1,500 sq. ft. have been omitted since experience indicates that they do not present any air pollution potential.

INTRODUCTION

This inventory report is a summary compilation of the major facilities of Real Property Owned by the Federal Government in this state. The detailed real property listing which supports this document was compiled by the General Services Administration pursuant to the authority contained in the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended.

The installations presented herein, are listed alphabetically by the city in which they are located and includes a brief description of the installation, the agency which operates the facility, the GSA inventory number, the GSA location code, the total floor area of all the buildings and a size classification code.

The operating agency and installation descriptions are those reported to the General Services Administration as of June 30, 1970. The GSA agency code is unique within a state and specifically identifies the installation. The first four digits represent the reporting agency and the remaining five identify the individual installations. The location codes are those prepared by the General Services Administration and establishes a standardized code of geographical locations covering the States, Counties and Cities within the United States. The first two digits represent the state code, the next three digits the county code, and the last four digits the city code in which the facility is located. The size category is based on the total floor area of all the buildings at the installation and is defined as follows:

category (1), greater than 1,000,000 sq. ft.;
" (2), 100,001 - 1,000,000 sq. ft.;
" (3), 1,501 - 100,000 sq. ft.;
" (4), 0 - 1,500 sq. ft..

Installations in category four have been omitted from this inventory. Experience indicates that this category generally includes facilities such as navigational aids, undeveloped building sites, telephone lines, etc., and currently does not present any air pollution potential.
